## ABOUT US

KKD Marine is a new company that began commercial operations in march 2017 in KAKINADA (KKD) to service the project requirements of existing and new projects in KG BASIN.

We will supply, repair and service all your marine and offshore consumables and equipment requirements for projects in KG BASIN region.

Our clients include McDermott Asia Pacific SDN BDN.

Our Parent company Project Sales Corp is a \$1.5million Oilfield Safety Company while KKD Marine focuses on Marine and Subsea Installation Markets for supplies and services to SURF contractors in the KG Basin Region.

## OUR USP

We are a new set-up and our USP will be a competitive pricing and localised service. Our focus is only on marine and oil and gas projects in KG BASIN. We will use our resources to help expedite deliveries of critical materials required to enable early completion of tasks in large projects.

## WHY US ?

KKD Marine is started by a team of people that assisted Helix Energy Services with consumables and equipment supply for the KG-D6 Project that involved installation of 11 suction piles, 28 umbilical, 10 structures, 6 manifolds, 10 trees & 56 rigid jumpers off the Kakinada coast. Materials over worth \$1 million was supplied In one year sourced from several countries and a dozen locations IN INDIA.

We also worked the HPCL SPM Project with Leighton Contractors and Heerema on GSPC project. We are currently working with Mc Dermott for supplies and services for the ONGC Vashishta project. We understand how important deadlines are in a large project. We will assign a team of people to provide dedicated services round the clock stationed in Kakinada and Project Site. We will use our expertise to get things done sooner at competitive prices and meeting quality requirements.

## PRODUCTS & SERVICES

KKD Marine will supply the complete range of consumables, equipment and services required for a large project in and around Kakinada. From abrasives, iron and steel, welding equipment to manpower, we will try and become an one-point source for all your needs.

We can provide re-certification services, equipment overhauls and repairs, welding services, fabrication, and any other requirements you have with project based associates with domain expertise in their respective fields.

For instance, Fabrication we have a tie-up with a vendor in Mumbai who does fabrication for several large offshore projects and oil and gas customers. For NDT and Welding we have a tie-up with a vendor in Visakhapatnam. For load testing, we have an associate in Kakinada and Mumbai.

## HOW WE WORK ?

Our key account team takes care of each key customer to ensure the complete cycle of enquiries to deliveries and payments is all taken care of in a seamless manner. Mails are responded promptly and phone access is available 24/7 with our 4000 sft office and warehouse in Kakinada and a dedicated logistics team, materials will be shipped to you from Kakinada, Visakhapatnam and all sourcing locations in India.

# **PRODUCT PORTFOLIO**

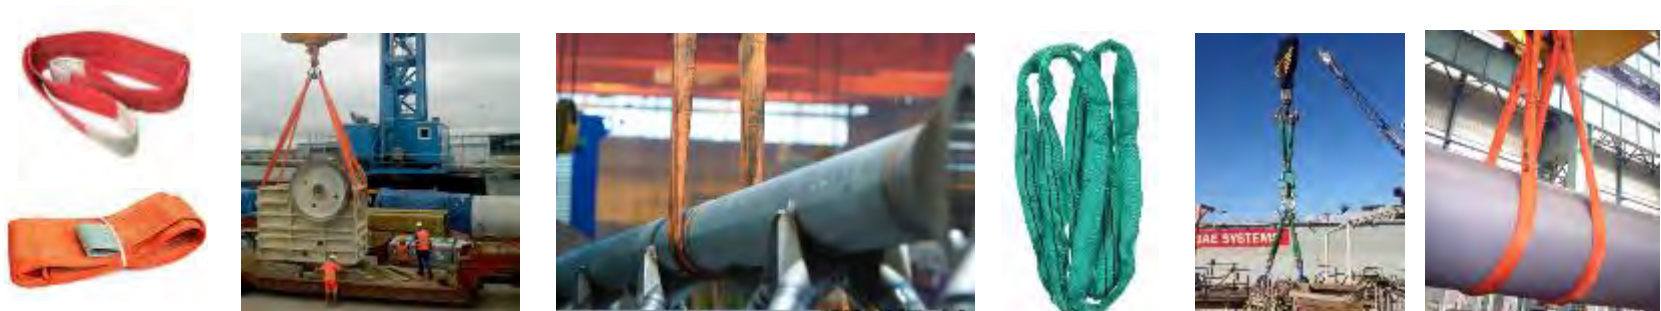

## Beam Clamps

**Beam clamps** can fit a wide range of flange width and beams, and are used for **lifting**, pulling, or as an anchor point.

## Flat Belts & Round Slings

High strength and low stretch flat belts and round slings are used for conveying, lifting and positioning applications.

## Mooring Ropes

Mooring ropes are used instead of temporary anchors as they have considerably more holding power, cause less damage to the marine environment, and are convenient. They are also occasionally used to hold floating docks in place.

## Pallet Fork Lifters

Pallet fork lifters features a cushion grip with a 3-position lever and a flow valve for controlled lowering. Push rods are fixed with no adjustment needed.

## PSC Lift Assist Hand Lifting Aids

A new range of PSC hands-off policy tools (lift assist manual lifting aids) to reduce need for bending thereby improve ergonomics in workplace, and reduce possible chances of hand & finger injuries associated with lifting and carrying the small equipment's with bare hands.

## Ratcheting Chain Binders

Ratchet chain or ratchet load binder, devices are used for ratcheting action to tension chain and secure cargo. A ratchet binder consists of a ratchet handle and two tension hooks on each end.

## Rigging Accessories

**Turnbuckle**, stretching screw or bottle screw is a device for adjusting the tension or length of ropes, cables, tie rods, and other tensioning systems.

**Master rings** and load suspension eyes are connectors used between the lifting hook and the load to be lifted. Master rings are most commonly used on lifting chain assemblies as the upper link though there are many other industrial applications which they could be used for. All the connectors in this category are certified for lifting applications.

**Eye bolts** are used as a removable attachment point, to secure ropes or cables. Basic eye bolts consist of a threaded rod with a loop or eye at one end. Commercial Eye bolts are marked with their thread size not with their working load limit, so it is important to ensure you select the correct type.

## Rope Block Sheaves, Swivels & Sockets

**Rope Block Sheaves** come in a variety of models, different in material, size, bearings and sealings, in order to meet your specific requirements. Apart from these standard sheaves we can offer you a large range of sheaves in many different sizes and bearings.

**Rope Blocks** may be used on a wide variety of land based cranes such as mobile and crawler cranes. The Fast Reeve Blocks are an excellent choice for your lifting application where frequent block change is required

**Closed Spelter Socket** loading mechanisms characterize themselves as very complex and was researched intensively by Ropeblock using strain gauge testing and Finite Element research. The full range of Ropeblock sockets are type approved by DNV GL and LRS.

## ROV HOOKS

Hooks are used in towing, mooring and lifting systems as a connection between slings, rope, wire rope and chain. ROV type hooks are modified for easy ROV handling during hook up or release.

Brands available are

- Crosby
- Nautilus

### Crosby® ROV Hooks

Hooks are opened remotely by cables and guided by pad eyes on either side of the hook.

ROV Hooks are used for efficient load handling and attachment for Remote Operating Vehicles in subsea and other hard to reach applications.

L320R Eye Hooks

L562A Shank Hooks

### Nautilus ROV Hooks

Nautilus ROV hooks incorporate patented locking technology with unique “Positive Locking” function, ensuring load integrity in the subsea environment. Innovative and cost effective, Nautilus subsea hooks eliminate the risk of load self-release, ensuring safe and secure subsea lifting operations.

## ROV Shackles

**ROV shackles** are suitable for subsea use and operation by a Remote Operated Vehicle. For the purpose of operating lifting equipment the Remote Operated Vehicle is fitted with a hydraulically controlled arm to safely release or retrieve heavy equipment under water. ROV lifting equipment is usually brightly coloured or white to assist the operator in identifying the components in poor or artificial light under water.

## Safety Pins for Shackles

**Safety pin shackles** are designed for maximum security and reliability. The shackle is secured using a nut and bolt, with the safety pin providing an extra layer of fastening to further safeguard against the shackle coming loose.

## Sea Fastening Lashing Belts

Sea fastening lashing belts are used to fasten and securing the loads.

## Skookum Blocks

**Skookum blocks** has two or more pulleys with a rope or cable threaded between them, usually used to lift or pull heavy loads. The pulleys are assembled together to form **blocks** and then **blocks** are paired so that one is fixed and one moves with the load.

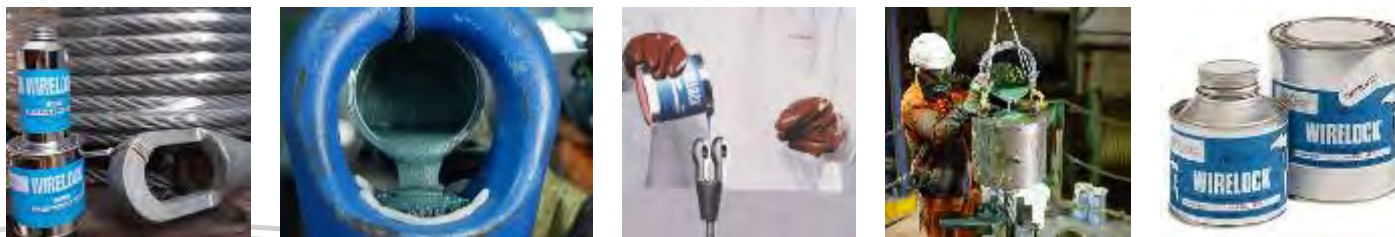

## Snatch Blocks

**Snatch blocks** and wire rope pulleys are common lifting mechanisms used for rigging. Using a snatch block in a block and tackle application reduces the amount of force required to lift an abnormally heavy object. A pulley system is used in conjunction with wire rope or other types of rigging ropes, by looping the rope through the pulley (around the sheave) several times before hooking to the object. The force required diminishes proportionately with the amount of pulleys or “loops” used during the hoist.

## Socketing Resins

Socketing compounds are used for wire ropes. Wirelock is the original cold socketing compound and, therefore, eliminates the hazards of working with a molten metal, allowing socketing to be done on site in virtually all weather conditions. It is extremely difficult to produce a void free socket when using molten metal, but extremely easy to produce a void free socket using Wirelock. This ensures a quality socket every time.

## Taglines

Taglines are otherwise known as a guide line, guide rope, end line, strap lines or pay off lines depending on which part of the world you are in but the most common term for use of a piece of rope is “**Tag line**”.

### Brands available under tagline are

- PSC LoadGuider Anti-Tangle Tagline
- PSC Rigtool Tagline
- PSC SafeGuider High-Viz Anti-Tangle Tagline

**PSC LoadGuider Taglines** are tangle resistant as it is designed with a rigid core and stiff cover braiding to prevent any turning on itself and wrapping around objects. The patented Helix spiral effect increases grip in wet and slippery conditions.

**Rigtools Taglines** attached to the load, allow personnel to have greater control of the lifting operation in a safe distance.

**PSC Safe-Guider™ High-Viz Taglines** are specially designed to be a safe alternative to ineffective and hazardous rope when guiding a suspended load.

## Tiger Chain Pulley Block

The TCB is manufactured from the highest quality steel materials, offering a lightweight, compact and rugged construction, producing an exceptionally strong product resistant to impact damage. The exceptional short head room allows for easy installation where every centimetre must be achieved.

## Tiger Subsea Lever Hoist

The design and anti-corrosion features incorporated in the SS11 hoist range give it significant safety advantages over standard lever hoists, making the hoist the ideal tool for all Marine and extreme applications.

## Weld on Pad Eyes

Weld on pad eyes are fabricated flat, bevelled and plate mounted with pad eyes to fit any lifting devices. Weld on lifting eyes are permanent lifting points used to connect slings and rigging hardware.

## Winch Sales & Rentals

KKD can provide mechanical and electrical winches for erection, pulling and lifting, etc. from a capacity of 250kg to 10 tonnes on new equipment sale basis or on rentals for projects duration.

## Wire Rope & Chain Slings

Wire rope slings have great strength combined with flexibility. They do not wear as rapidly and the indication of broken wires and appearances show its true condition. Chain has the advantage of being better suited for lifting rough loads and withstanding high temperatures. When possible use a wire rope sling instead of a chain sling. The failure of a single link of a chain can result in an accident.

## Wire Spooling Services

KKD Marine offers wire spooling, coiling and winding services.

# **SERVICES PORTFOLIO**

## LSA/FFA Testing and Repairs

KKD Marine can do testing, repairing and certification of lifting appliances, life saving & fire fighting appliances, testing & certification of anchors & anchor cables, etc.

## Paints and Marine Chemicals

We can source and supply Akzo Nobel, Jotun, Hempel, Sigma etc in marine paints and all Drew and Unitor Chemicals as required.

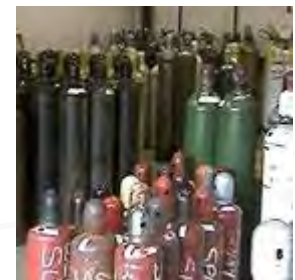

## Rubber Products & Hoses

Whether you need large quantity of rubber sheets in butyl, neoprene or any other composition or hoses of any kind - air, hydraulic, water, etc we supply all of these.

## Industrial Gases

We can supply all industrial gases required for the project. Please contact us for filling, rentals or new cylinders.

## NDT Materials & Manpower

Whether you need MPI, DP, Radiography equipment and consumables or manpower for these, we can provide you the complete range.

## Navigation Charts & IMO Signs

We provide all kinds of navigational items including lights, spares, charts, etc. A complete range of visual identification products including pipe markers, symbols, etc can be supplied.

## Spill Management Products

With large projects and vessel operations sometimes accidental spills can happen. We can supply all spill management and control products including booms, pads, pillows, containment trays, etc

## Tools and Hardware

When you need heavy duty tools for offshore use - hand tools, pneumatic, hydraulic tools, etc or any kind of hardware for marine and offshore use, contact us for a quote.

## General Consumables

No matter you are looking for trash bags, adhesives, tapes, abrasives, welding consumables, fittings, pipe markers, etc contact us for a quote

## Subsea Lubrication Products

When you need specialised lubricants for underwater use, contact us for a quote. We can supply Bridon, Aquashield, TS Moly, Cameron, Mystik etc from stocks maintained by associate companies.

## PPE & Workplace Safety Items

KKD Marine can provide all PPE and Workplace Safety Items within few hours of order. We have dedicated suppliers stocking the products in Vizag and Kakinada.

## Iron and Steel Materials

No matter what you are looking for - angle, channels, flats, wire rods, bars, etc drop us an email and we will send you a quote.

## **Guest Houses, Office Space, Yards, Etc**

We can provide hospitality services and arrange guest houses, etc on rent.

## **Explosion Proof Lighting Solutions**

KKD Marine can supply explosion proof lighting solutions confined space entry, washdowns, temporary power distribution and lighting, general maintenance, hazardous locations, etc

## **Special Valves and Marine Fittings**

We source and supply special valves those are not available locally from US, Europe and Asia. Brands include Demco, Econosto, Z-Tide, etc. Third party certification available

## **Wire Rope Slings**

KKD Marine can provide wire rope slings right upto 250 tons for the toughest jobs offshore. Our slings are done in association with Sealinkers, using Usha Martin wire ropes.

## Crosby Rigging Hardware

The Crosby Group is a manufacturer of the finest lifting and material handling products in the world. Crosby® products such as Crosby hooks, Crosby swivels, Crosby shackles are industry standard.

## Rigging Recertification

We can provide re-certification services for rigging materials and load testing in Kakinada. Please send an email to [sales@kkdmarine.co.in](mailto:sales@kkdmarine.co.in) for a no obligation quote.
